

Bring faculty, staff, campuses, communication, and shared work into one institutional model.

We connect institutional Mail, meetings, files, calendars, contacts, documents, boards, and delegated administration for schools and higher-education organizations that need simplicity at the user level and control at the institutional level.

- 1

The need

Education institutions must serve many people, roles, campuses, and domains while protecting institutional identity and keeping administration affordable.
- 2

The first outcome

Import or provision users in bulk and organize them by institution, domain, and role.

Start Identity and Mail	Coordinate Chat/Meet and schedules	Connect Suite and structured work	Govern Administration and reports
