

Connect offices, field teams, and local leadership in one manageable workspace.

We help provinces, cities, municipalities, and local offices keep communication, meetings, files, work items, and administration visible even when teams are distributed and IT resources are limited.

1

The need

LGUs need dependable communication and coordination across departments, locations, leadership transitions, emergencies, and everyday constituent service.

2

The first outcome

Keep official domains, users, groups, and services under the LGU's administrative view.
