

GoOfficePH Connected Workspace

We keep the message, meeting, file, schedule, contact, board, whiteboard, and credit action around one piece of work without duplicating its source.

The screenshot displays the GoOfficePH Connected Workspace interface. At the top, there's a header with the GoOfficePH logo, navigation buttons for 'Website' and 'Groupware', and a user status indicator 'Signed in as Operations Administrator'. The main content area is titled 'GOOFFICEPH GROUPWARE Connected Workspace' and includes a search bar. Below this, there are four summary cards: '12 Mail', '8 Suite', '4 Chat/Meet', and '7 Work Boards'. The 'MY WORK' section features a 'Follow-ups' list with items like 'Confirm regional service owners' and 'Publish continuity plan'. The 'ACROSS APPS' section shows 'Search results'. The 'ACTIVITY' section lists 'Recent connected work' such as 'Regional operations review'. A 'Report issue' button is located in the bottom right corner of the interface.

GoOfficePH Connected Workspace

Keep related messages, meetings, files, schedules, contacts, boards, whiteboards, and credit actions close to the work they support.

We keep the message, meeting, file, schedule, contact, board, whiteboard, and credit action around one piece of work without duplicating its source.

Keep context close

See related items from each app without replacing the source of truth.

Capture the next action

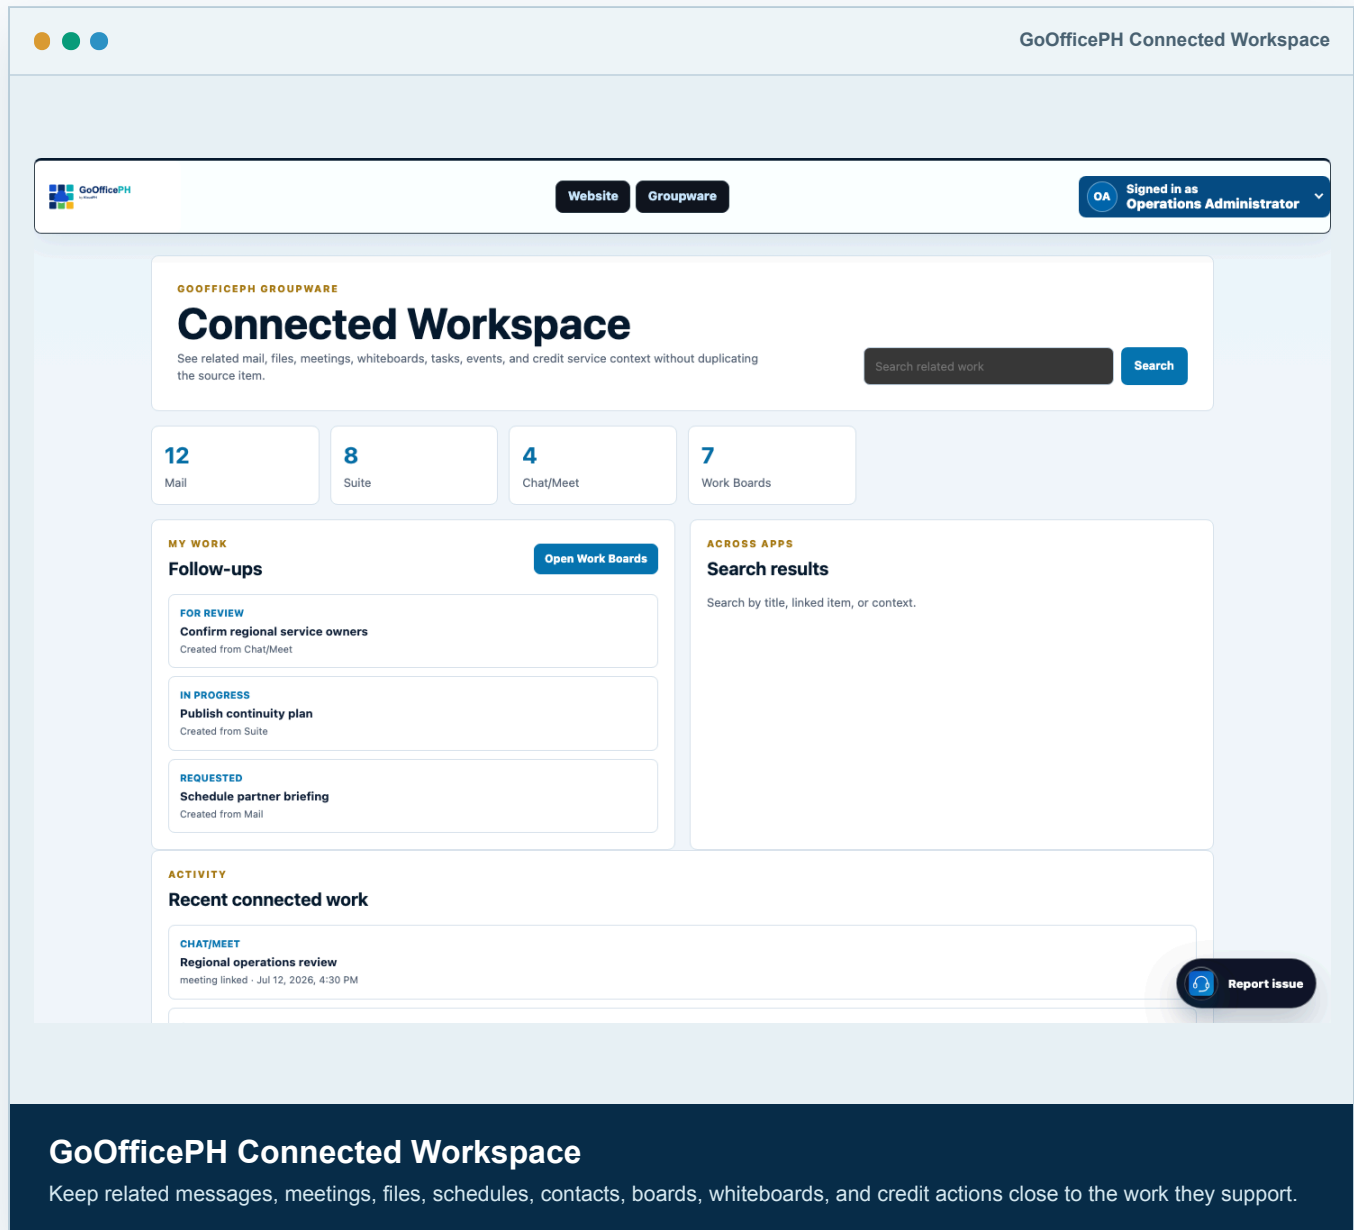

Turn a message, meeting decision, file review, or visual note into owned follow-up.

Apply policy once

Identity, tenant, permissions, audit, and reporting follow the connected work.

The application experience and the controls around it operate as one GoOfficePH service.

A complete, recognizable interface - not a decorative crop.

Follow the task from entry to outcome.

Open context

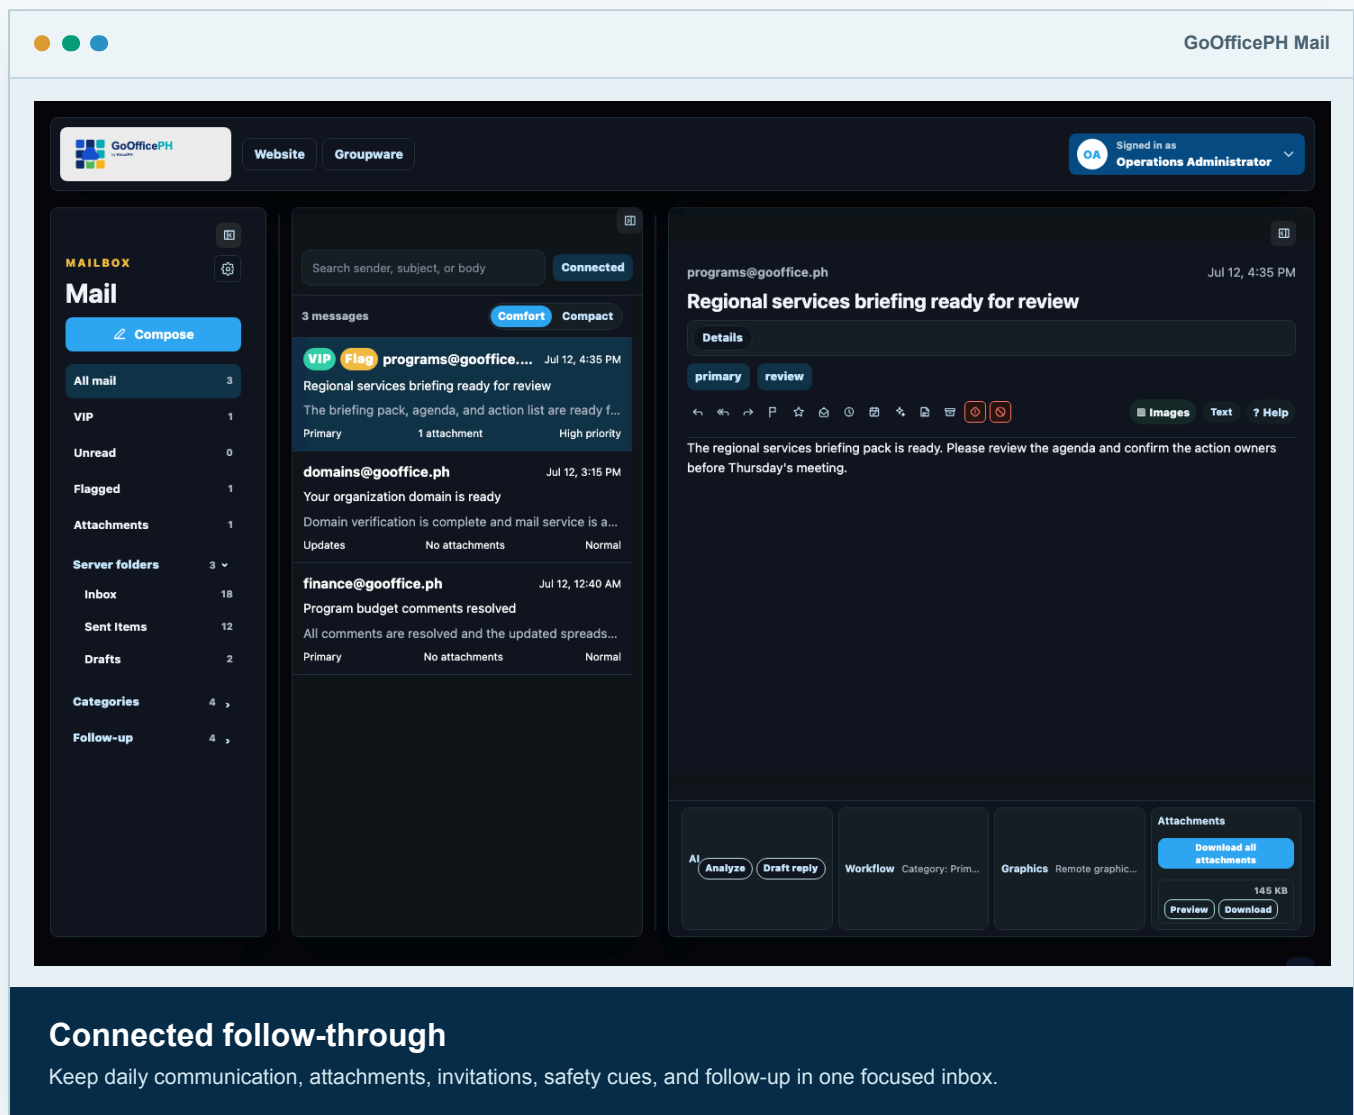

Start from the app where the work originated.

Connect related items

Add the relevant file, event, room, contact, board card, or whiteboard without copying it.

Follow through

Track the owned next action while keeping every source reachable.

The screenshot displays the GoOfficePH Mail application interface. The top navigation bar includes the GoOfficePH logo, 'Website' and 'Groupware' links, and a user profile for 'Operations Administrator'. The left sidebar shows a 'MAILBOX' with 'Mail' selected, listing folders like 'All mail', 'VIP', 'Unread', 'Flagged', 'Attachments', 'Server folders', 'Inbox', 'Sent Items', 'Drafts', 'Categories', and 'Follow-up'. The main content area shows a 'Connected' status and a list of 3 messages. The first message is from 'programs@gooffice.ph' with the subject 'Regional services briefing ready for review'. The second message is from 'domains@gooffice.ph' with the subject 'Your organization domain is ready'. The third message is from 'finance@gooffice.ph' with the subject 'Program budget comments resolved'. The right sidebar shows a 'Details' view for the first message, including a 'primary' tab, a 'review' button, and a 'Download all attachments' button. The bottom section of the interface features a 'Connected follow-through' banner with the text 'Keep daily communication, attachments, invitations, safety cues, and follow-up in one focused inbox.'

Connected follow-through

Keep daily communication, attachments, invitations, safety cues, and follow-up in one focused inbox.

Make the experience simple without hiding operational depth.

CONTEXT

Related work

Bring relevant items from the suite into one readable view.

CONTEXT

Source links

Return to the original message, file, meeting, or record in one action.

CONTEXT

Shared identity

Use consistent people, tenant, and permission context across apps.

EXECUTION

Capture follow-up

Create owned work without losing the source conversation.

EXECUTION

Activity view

See meaningful changes around the shared context.

EXECUTION

Reports and policy

Apply organization visibility and governance to connected work.

GoOfficePH Mail

Keep daily communication, attachments, invitations, safety cues, and follow-up in one focused inbox.

GoOfficePH Chat/Meet

Bring members and guests into persistent rooms, voice, video, screen sharing, recordings, and transcripts.

GoOfficePH Suite

Keep files, sharing, documents, spreadsheets, presentations, exports, versions, and storage in one workspace.

GoOfficePH Work Boards

Turn messages, meetings, documents, and approvals into visible owners, due dates, reviews, and completed work.

GoOfficePH Connected Workspace features - 1 of 2

Technical readers can scan the implemented capability. Everyone else can read what that capability changes in everyday work.

TECHNICAL CAPABILITY	WHAT IT MEANS FOR YOU
CONTEXT	
Related-item workspace	See the work connected to the current subject without replacing its source.
Mail source links	Return to the conversation that started the work.
Chat/Meet room and recording links	Keep the discussion and meeting record reachable.
Suite file links	Open the document or evidence supporting the work.
Calendar event links	Keep the schedule and meeting commitment attached.
Contact links	See the people associated with the work.
Work Board card links	Reach the owned task and its current delivery state.
Whiteboard links	Preserve the visual discussion connected to the outcome.
Wallet transaction links	Connect approved credit activity when it supports the work.

Customer-facing capability register for the current GoOfficePH production experience. Availability can depend on role, organization policy, subscription, device, and deployment configuration.

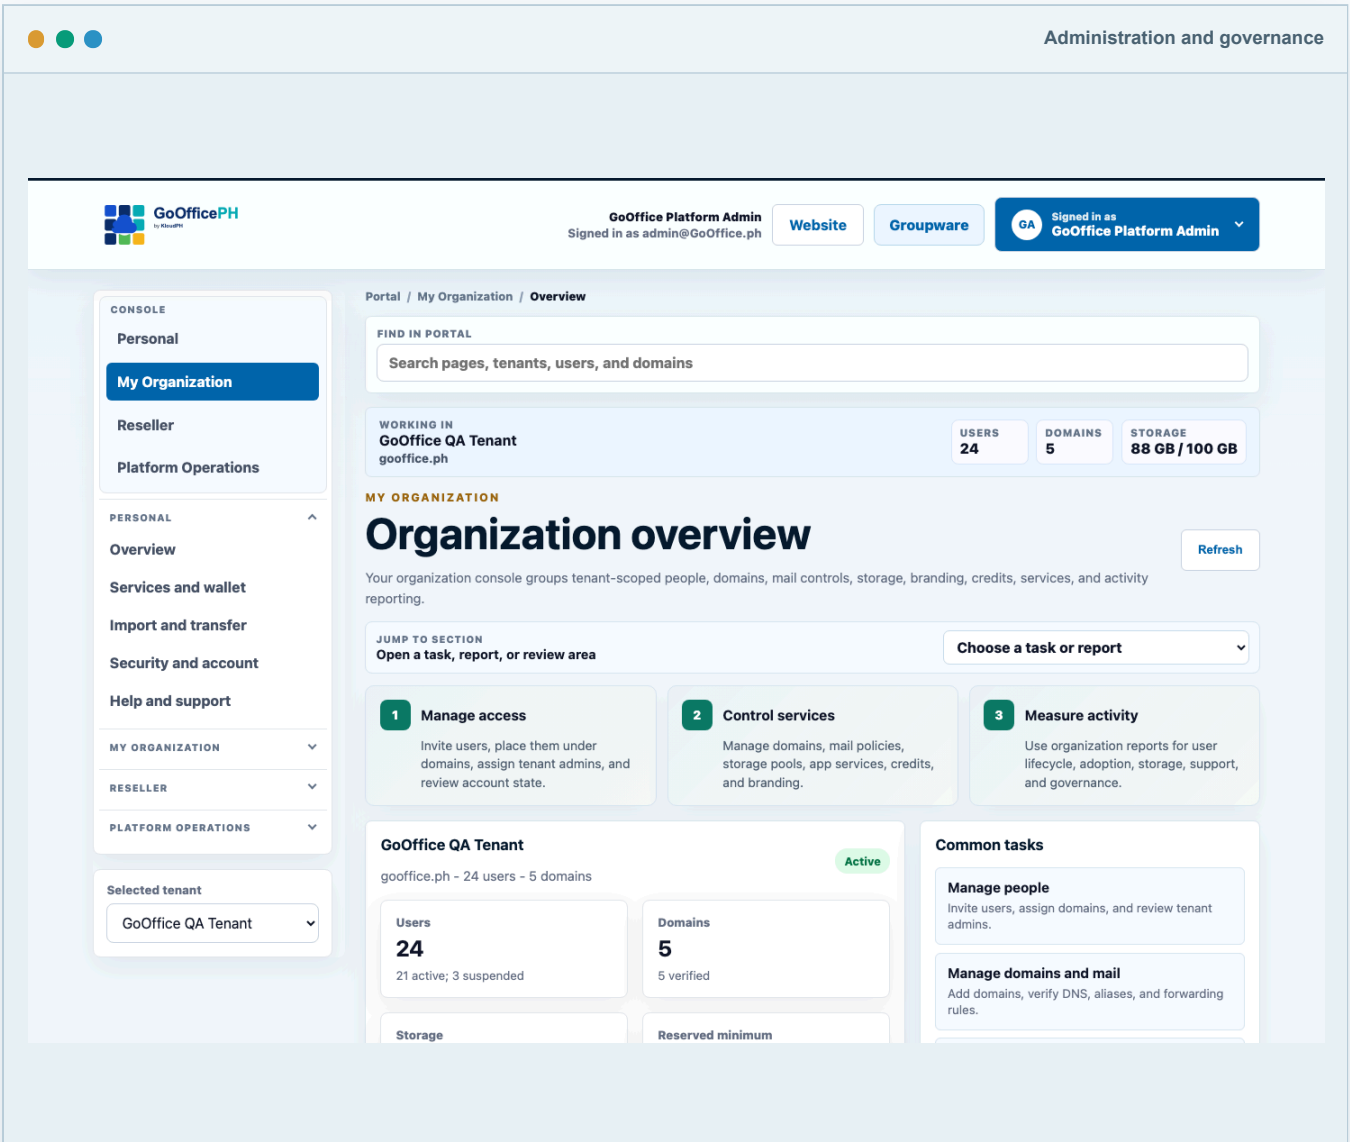

GoOfficePH Connected Workspace features - 2 of 2

Technical readers can scan the implemented capability. Everyone else can read what that capability changes in everyday work.

TECHNICAL CAPABILITY	WHAT IT MEANS FOR YOU
CAPTURE	
Create related work item	Turn context into an owned next action without copying source content.
FIND	
Related-work search and filters	Reach the relevant item when a workspace contains many records.
IDENTITY	
Shared account, tenant, and domain context	Keep people and organizational boundaries consistent across apps.
PERMISSIONS	
Source-aware access checks	Avoid exposing a linked item to someone who cannot open its source.
ACTIVITY	
Connected activity timeline	Review meaningful changes across the related work.
GOVERNANCE	
Cross-app audit and reporting context	Understand the wider workflow around an event during review.

Customer-facing capability register for the current GoOfficePH production experience. Availability can depend on role, organization policy, subscription, device, and deployment configuration.

The product remains manageable after adoption.

Role-aware administration

People, services, policy, and evidence remain connected to the application.

Administration Users, roles, services, policy, and configuration	Security Identity, access, protection, and response	Audit Actor, action, target, tenant, result, and time	Reports Online analysis and professional exports
--	---	---	--

Introduce the capability around a real outcome.

Confirm the audience

Identify the users, tenant, domains, roles, and external participants involved.

Set policy and access

Apply the organization's service, security, sharing, storage, and retention requirements.

Move a real workflow

Use representative content and measure whether the new path improves clarity and follow-through.

Review and expand

Use activity, support, audit, and report data before increasing the rollout.

Included in the workspace. Production version 1.0.0.
