

GoOfficePH Wallet

We make credits easy to receive, allocate, sell, and apply while keeping personal, tenant, reseller, and staff balances clearly separated.

The screenshot displays the GoOfficePH Wallet interface. At the top, there's a navigation bar with the GoOfficePH logo, links for 'Website' and 'Groupware', and a user profile section indicating 'Signed in as Operations Administrator'. The main heading is 'Credit wallet', with a subtext explaining that credits are internal GoOfficePH value for apps, storage, and services. A 'Wallet safeguard' note states that related work may show an active service entitlement but cannot create, approve, or move credits. The central part of the interface shows the 'Available personal credits' as 1,250, with a note '1 credit = PHP 1' and buttons for 'Send credits' and 'Receive'. Below this, three wallet balances are listed: 'Personal wallet' (1,250 credits), 'Tenant wallet' (48,600 credits), and 'Reseller balance' (1,250 credits). Each wallet has a brief description of its use. At the bottom, there's a 'PRIVATE HISTORY' section titled 'Activity and receipts', which includes a 'Copy statement' link and a list of transactions, such as 'Tenant service allocation' with a '+500 credits' entry. A 'Report issue' button is located in the bottom right corner.

GoOfficePH Wallet

Signed in as Operations Administrator

GOOFFICEPH WALLET

Credit wallet

Credits are internal GoOfficePH value for apps, storage, and services.

Wallet safeguard: Related work may show an active service entitlement, but it cannot create, approve, or move credits. Every credit action stays in this Wallet with its existing role, confirmation, and ledger controls.

Available personal credits

1,250

1 credit = PHP 1

Send credits Receive

Personal wallet
1,250 credits
For your own services and verified transfers.

Tenant wallet
48,600 credits
Separate from your personal wallet.

Reseller balance
1,250 credits
Sell only to verified GoOfficePH users or tenants.

Allocate from tenant wallet Sell credits

PRIVATE HISTORY Copy statement

Activity and receipts

Transfers are visible to the sender, recipient, authorized tenant administrators, and GoOfficePH audit staff.

Tenant service allocation +500 credits

Report issue

GoOfficePH Wallet

Keep verified credit allocation and product activation visible across personal, tenant, reseller, and staff roles.

We make credits easy to receive, allocate, sell, and apply while keeping personal, tenant, reseller, and staff balances clearly separated.

Know which wallet is acting

Personal, tenant, reseller, and staff balances remain distinct at every decision.

Transfer with confidence

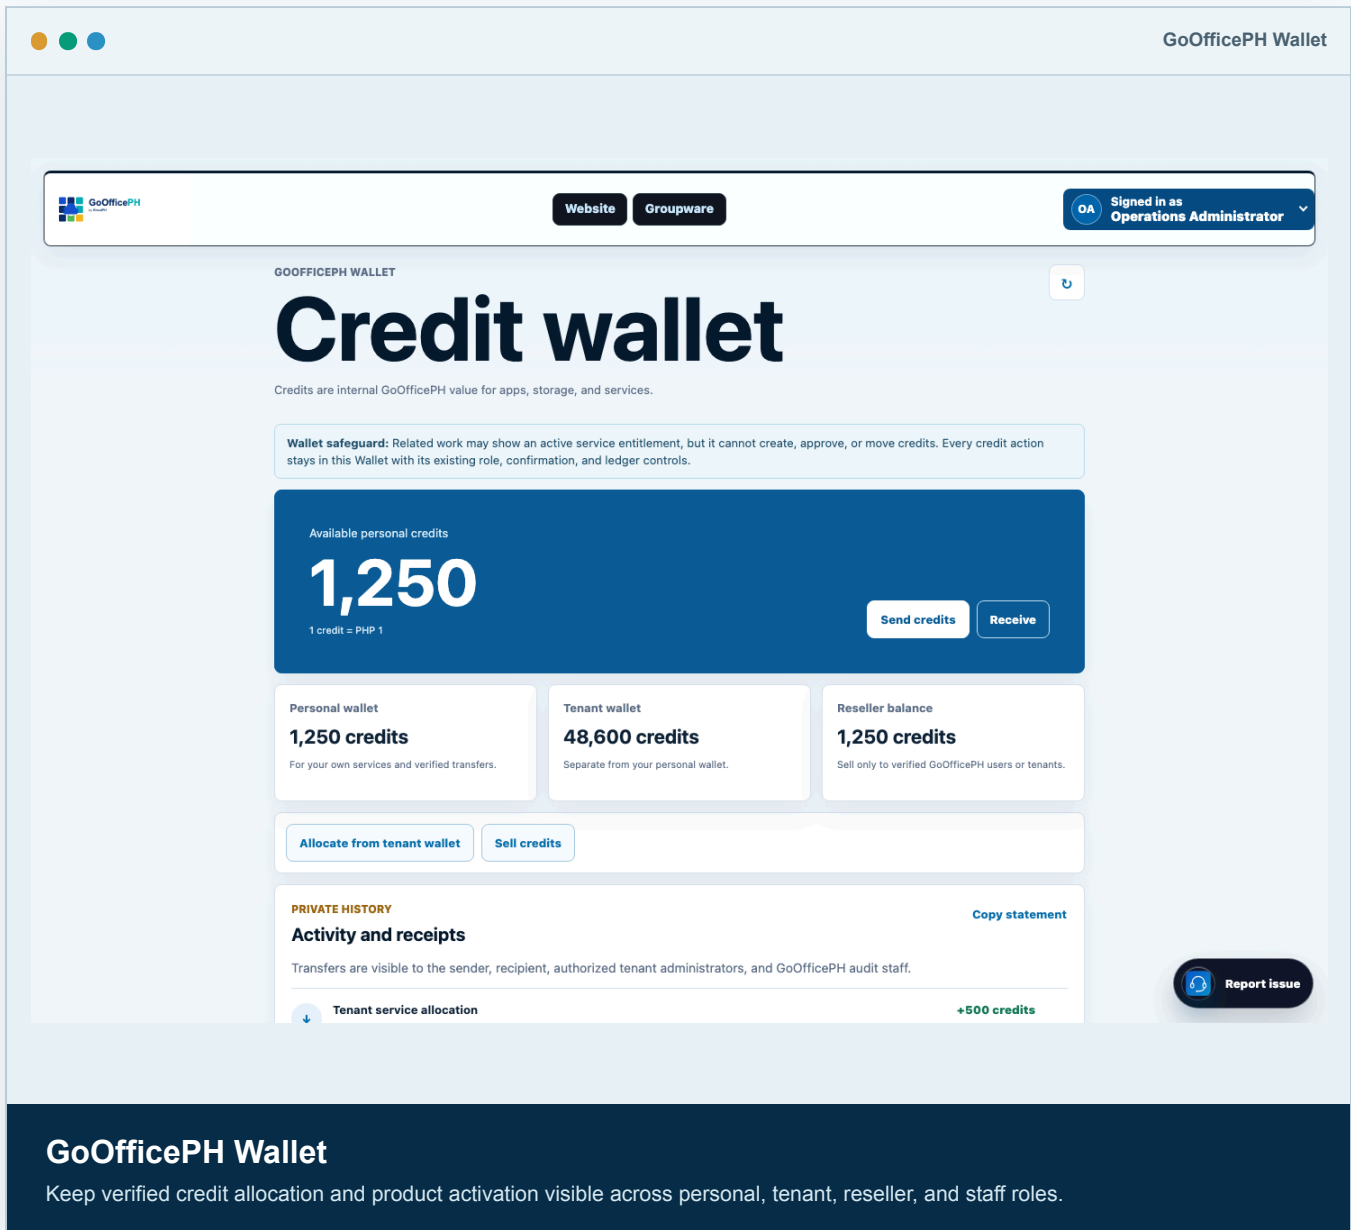

Verify the recipient, purpose, reference, and resulting balances before committing.

Keep a usable record

Receipts and private ledger history make each credit movement reviewable.

The application experience and the controls around it operate as one GoOfficePH service.

A complete, recognizable interface - not a decorative crop.

Follow the task from entry to outcome.

Choose the wallet

Confirm whether the action belongs to a person, tenant, reseller, or GoOfficePH staff balance.

Verify the recipient

Search the eligible user or tenant and review the destination before sending.

Complete and review

Record the transfer, issue a receipt, and preserve the ledger entry for audit.

The screenshot displays the GoOfficePH Connected Workspace interface. At the top, there's a header with the GoOfficePH logo, navigation buttons for 'Website' and 'Groupware', and a user status indicator 'Signed in as Operations Administrator'. Below the header, the main content area is titled 'GOOFFICEPH GROUPWARE Connected Workspace'. It includes a search bar for 'Search related work' and a 'Search' button. A dashboard section shows four metrics: 12 Mail, 8 Suite, 4 Chat/Meet, and 7 Work Boards. Below this, there are three main sections: 'MY WORK' with 'Follow-ups' (including 'FOR REVIEW', 'IN PROGRESS', and 'REQUESTED' items), 'ACROSS APPS' with 'Search results', and 'ACTIVITY' with 'Recent connected work'. A 'Report issue' button is located in the bottom right corner of the workspace area.

Connected follow-through

Keep related messages, meetings, files, schedules, contacts, boards, whiteboards, and credit actions close to the work they support.

Make the experience simple without hiding operational depth.

ROLE-AWARE ACTIONS

User wallet

Receive credits from authorized senders and apply them to personal services.

ROLE-AWARE ACTIONS

Tenant wallet

Allocate credits to members or activate and extend products on their behalf.

ROLE-AWARE ACTIONS

Reseller and staff flows

Sell or grant credits through permission-gated, audited transactions.

TRANSACTION CONFIDENCE

Recipient verification

Reduce mistakes by confirming identity and eligibility before submission.

TRANSACTION CONFIDENCE

Wallet separation

State which balance will be debited and which balance will receive the credits.

TRANSACTION CONFIDENCE

Receipts and ledger

Retain references, notes, timestamps, actors, and resulting balances.

GoOfficePH Connected Workspace

Keep related messages, meetings, files, schedules, contacts, boards, whiteboards, and credit actions close to the work they support.

Desktop GoOfficePH Groupware

Give managed Windows, macOS, and Linux devices a consistent desktop path into Mail, Suite, Chat/Meet, Calendar, and Contacts.

GoOfficePH Wallet features - 1 of 2

Technical readers can scan the implemented capability. Everyone else can read what that capability changes in everyday work.

TECHNICAL CAPABILITY	WHAT IT MEANS FOR YOU
WALLETS	
Personal wallet	Keep an individual user's credits separate from organization funds.
Tenant wallet	Give the organization its own balance for users and services.
Reseller wallet	Separate partner inventory and customer sales from personal credits.
GoOfficePH staff grant wallet	Keep authorized platform grants distinct and permission-gated.
TRANSFERS	
Verified recipient search	Confirm the person or tenant before sending credits.
User-to-user receipt flow	Create a clear record when an authorized user receives credits.
Tenant allocation to users	Let tenant administrators fund members from the organization wallet.
Tenant product activation and extension	Allow the organization to activate or renew a member's service on their behalf.
Reseller sale to user or tenant	Sell credits to the intended customer from the reseller balance.
Staff credit grant	Issue approved credits through a controlled platform action.

Customer-facing capability register for the current GoOfficePH production experience. Availability can depend on role, organization policy, subscription, device, and deployment configuration.

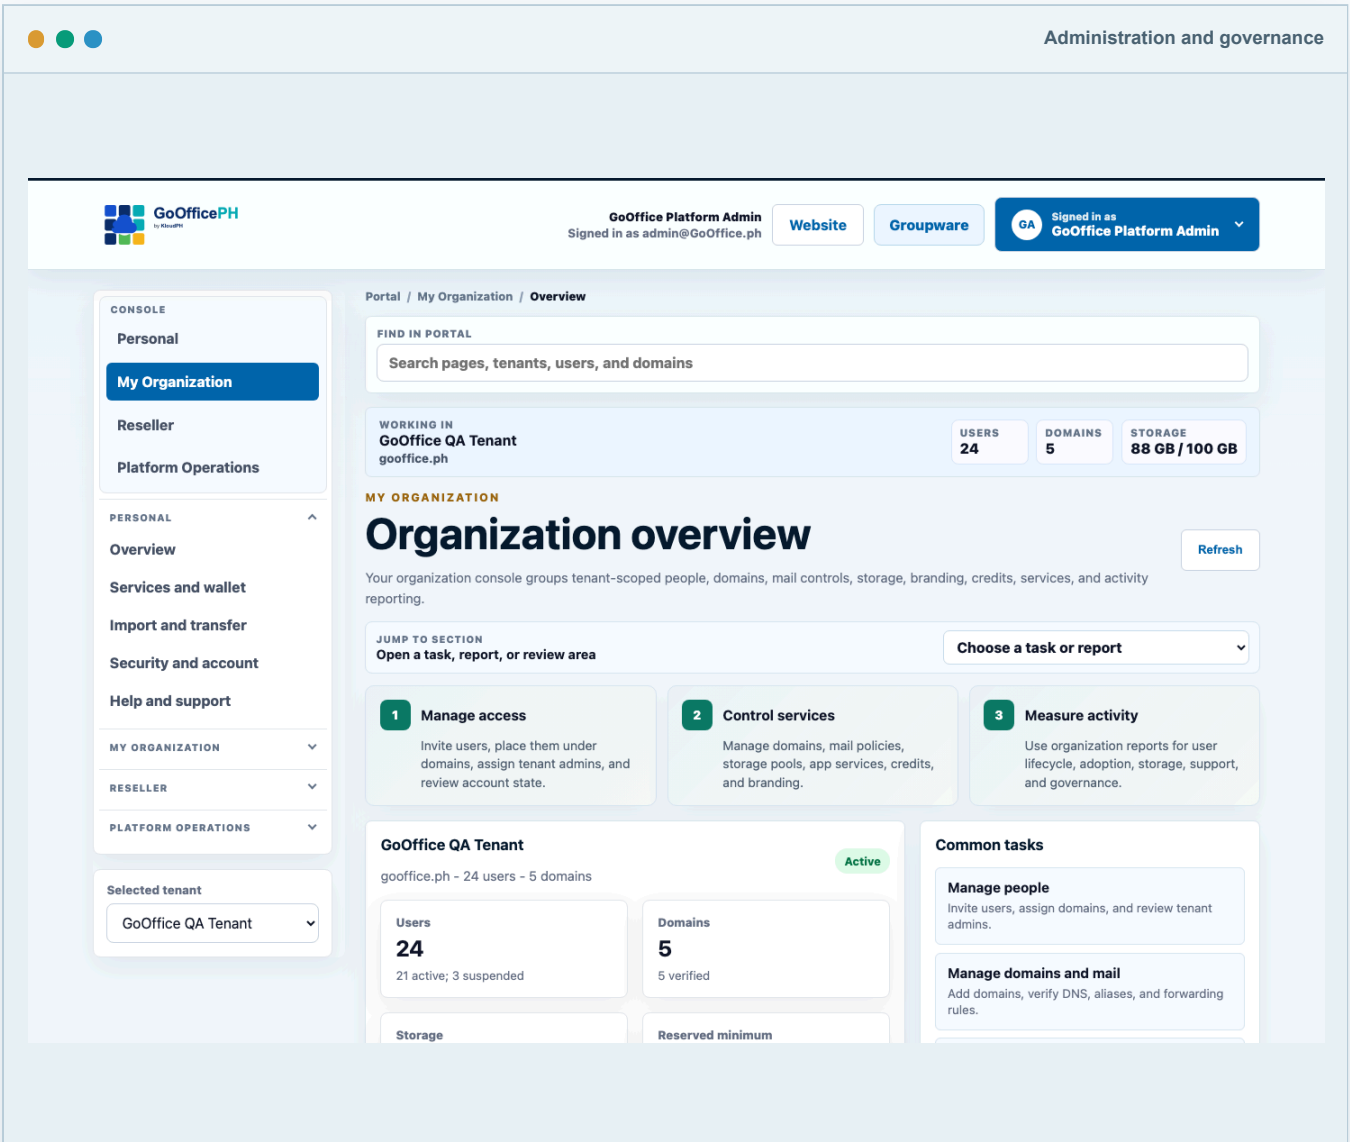

GoOfficePH Wallet features - 2 of 2

Technical readers can scan the implemented capability. Everyone else can read what that capability changes in everyday work.

TECHNICAL CAPABILITY	WHAT IT MEANS FOR YOU
CONTROLS	
Role and permission gates	Only show actions a person is authorized to complete.
Wallet-context confirmation	State exactly which balance will be debited before commitment.
Transaction acknowledgement	Require confirmation for consequential transfers.
RECORDS	
Transaction receipts	Give both sides a reference for a completed credit movement.
Private ledger history	Review dates, actors, recipients, references, notes, and balances.
Reconciliation status	Identify transactions that need financial or operational review.
SERVICES	
Product and storage application	Use received credits for eligible GoOfficePH services.
RESPONSIVE	
Mobile-focused transaction flow	Complete essential allocation work comfortably from a phone.

Customer-facing capability register for the current GoOfficePH production experience. Availability can depend on role, organization policy, subscription, device, and deployment configuration.

The product remains manageable after adoption.

Role-aware administration

People, services, policy, and evidence remain connected to the application.

Administration Users, roles, services, policy, and configuration	Security Identity, access, protection, and response	Audit Actor, action, target, tenant, result, and time	Reports Online analysis and professional exports
--	---	---	--

Introduce the capability around a real outcome.

Confirm the audience

Identify the users, tenant, domains, roles, and external participants involved.

Set policy and access

Apply the organization's service, security, sharing, storage, and retention requirements.

Move a real workflow

Use representative content and measure whether the new path improves clarity and follow-through.

Review and expand

Use activity, support, audit, and report data before increasing the rollout.

Included in the workspace. Production version 1.0.1.
